SUMMARY

Passionate **Frontend Developer** with experience in UI/UX design, React, and TypeScript. Successfully developed and contributed to multiple projects, including eCommerce, agriculture, and healthcare websites. Strong foundation in Linux/Unix environments, open-source contributions, and automation scripting. Seeking to leverage my skills for Hennge's **Computer Engineering (Frontend)** learning opportunity.

EDUCATION

Pentecost University – Accra, Ghana
Bachelor's Degree in Computer Science (Graduated: December 2024)

TECHNICAL SKILLS

- **Frontend Development**: React.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS

- **UI/UX Design**: Figma, Adobe XD, Wireframing, Prototyping

- **Backend Technologies**: PHP, Node.js

- **Version Control**: Git, GitHub

- **Linux/Unix**: Bash Scripting, Server Deployment, System Administration

- **Other Tools**: Docker, Nginx, REST APIs, Agile/Scrum

PROJECT EXPERIENCE

1. Let's Buy (E-commerce Website)

Developed a fully responsive eCommerce platform with user authentication, product filtering, and a seamless checkout experience.

- **Tech Stack**: React.js, TypeScript, Tailwind CSS, Firebase, Stripe API

- Implemented dynamic UI components for a smooth user experience

- Integrated secure payment processing with Stripe

2. Mosaic Grove (Agricultural Website)

Designed and developed a website to connect farmers with buyers and provide agricultural insights.

- **Tech Stack**: React.js, TypeScript, Node.js, PostgreSQL

- Designed a user-friendly interface for farm management and product listing

- Implemented a real-time chat system for buyer-seller communication

3. Mother and Child Hospital (Healthcare Website)

Created an informative and appointment-booking platform for a local hospital.

- **Tech Stack**: React.js, TypeScript, Tailwind CSS, Firebase

- Built an interactive and mobile-friendly interface

- Integrated an appointment scheduling feature with email notifications

---

LINUX/UNIX PROJECTS

1. Server Setup & Deployment

Configured and deployed a **React-based web application** on a Linux server using **Nginx** as a reverse proxy. Managed server security and performance optimizations.

2. Shell Scripting for Automation

Developed **Bash scripts** to automate system updates, backups, and log management on a Unix-based system.

OPEN-SOURCE CONTRIBUTIONS

1. React UI Component Library Contribution

Contributed improvements and bug fixes to an **open-source React UI framework**, focusing on **accessibility and UI responsiveness**.

2. Documentation & Code Contributions

Provided **code fixes** and improved documentation for an **open-source TypeScript-based project**, enhancing developer experience.

WORK EXPERIENCE

UI Designer – KinFlip *(Jun 2023 – Aug 2023)*

- Designed user-friendly interfaces for a **transportation booking system**
- Collaborated with front-end developers to implement UI components
- Conducted user testing to refine UX design

Intern Software Developer – Orcons Company Ltd *(Jan 2021 – June 2023)*

- Developed a **school management system** with user authentication and role-based access control
- Created **responsive UI designs** for educational software solutions
- Worked closely with backend developers to integrate front-end features

---

CERTIFICATIONS & AWARDS

- **Hennge Challenge Completion – Computer Engineering (Frontend) Pathway**
